

Total number of deaths where Covid 19 was singular cause of death from 01/02/20 to date.

10 sole recorded cause of death (for deaths registered up to 05/02/21)

Total number of deaths where Covid 19 is shown as the primary cause of death from 01/02/20 to date.

85 was primary (underlying) cause of death (for deaths registered up to 05/02/21)

Total number of deaths where Covid 19 has been shown as a contributory factor from 01/02/20 to date

88 where contributing factor including as the primary (underlying) cause of death (for deaths registered up to 05/02/21)

Total number of deaths where Covid 19 may have been a contributory factor ie tested positive within last 28 days from 01/02/20 to date.

The Public Health Scotland dashboard publishes data on deaths with a positive COVID19 test within 28 days of death but this will include deaths at all sites in the region in all settings not just hospital. This figure was 129 deaths up to 05/02/21.

We do not have a figure specifically for hospital deaths within 28 days of a positive COVID19 test.
